

Fast way to Build Motion Control System

Specifications

PCEzGo utility

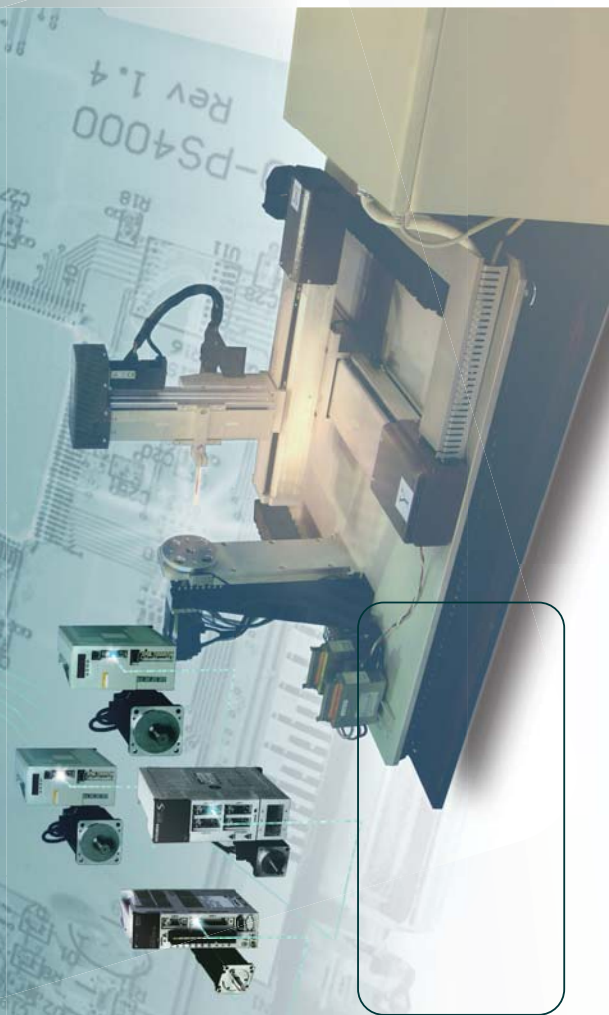

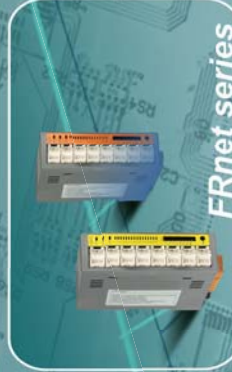

PCEzGo assists the machine developer to debug any cabling problem, Mechanical I/O logic setting, and check all axes configuration before programming.

Terminal Board

- DN-8468: General purpose
- DN-8468M: For Mitsubishi Servo Amplifier
- DN-8468P: For Panasonic Servo Amplifier

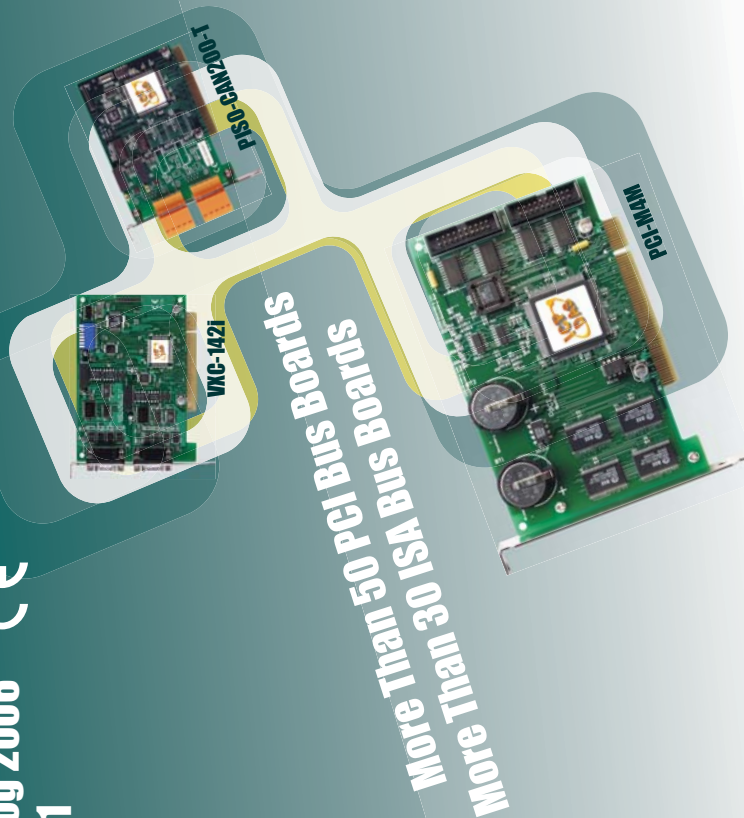

Ordering Information

- Standard
- PISO-PS400/S: High Speed 4-Axis Motion Control Card, Include PISO-PS400A-DN-8468-CA-SCSI15
- Optional
- DN-8468: Daughter board (wiring terminal board) for general purpose amplifier, Din-Rail mountable
- DN-8468M: Daughter board (wiring terminal board) for Mitsubishi Servo Amplifier, Din-Rail mountable
- DN-8468P: Daughter board (wiring terminal board) for Panasonic Servo Amplifier, Din-Rail mountable
- CA-SCSI15: 68-pin SCSI-II connector Cable 1.5m

High Quality, Industrial Data Acquisition and Control Products for ISA and PCI Bus
