

## Dear Customers

You can find several software solutions are included in this new short form, such as Indusoft SCADA software, ISaGRAF, Matlab...etc. We also develop diversified drivers for different software environment.

To meet the new demand of our clients, more and more I-7000 modules will be developed and will be released in the near future. Because the good price-performance and excellent technical support, the sales volume of our compact embedded controller I-8000 is taking off. Palm-size embedded controller I-7188 is another hot item for space critical control system. A new I-7188 with CAN bus will be available soon.

- We are proud to introduce our first Windows CE Embedded controller WinCon-8000.

- High speed & Low power Consumption I-7188 version will be available before Mar of 2004.

- SST-2450 Radio Modem got FCC certification and CE mark for several European countries.

- High voltage Input protection I-7017, I-7018, I-8017, I-87017 analog input modules will be available before Mar of 2004.

- Industrial Ethernet Switch and Fiber-optical Switch are available now.

- Signal Conditioner modules are our next goal to complete our product line.

**OEM & ODM program are welcomed ,
