## CANopen Slave

## 8-chanmel RTD Input Module of CANopen Slave C FC

CAN-2015C

Dimensions

CAN-2015C module follows the CiA DS-301 version 4.02 and DSP-401 version 2.1. You can access the thermocouple input status and set the configuration by using standard CANopen protocol. CAN-2015C has passed the validation of the CiA CANopen conformance test tool. Therefore, you can use it with standard CANopen master easily by applying the EDS file. CAN-2015C has 8 differential RTD input channels. By the CANopen masters of ICP DAS, you can quickly build a CANopen network to approach your requirement.
