How to upgrade the PAC's Win-GRAF Driver ?

For updating add-on functions, I/O boards or other purposes, ICP DAS may release new PAC 's Win-GRAF driver in the future. Users can get the latest version that's available for different PAC models from the following Web .

http://www.icpdas.com/root/product/solutions/softplc_based_on_pac/win-graf/download/wingraf-driver.html

The below steps is using for RPAC-2658M. Please follow the steps to upgrade the new driver into your PAC.

Step 1:

a. Prepare a flash drive

b. Format you flash drive with fat32 format

c. Put patch file to your flash drive

   Patch file is patch_vxx.xx.zip

patch_v0.10.zip

Step 2:

Plug you flash driver to USB port of RPAC-2658M and switch the rotary switch to position 4.
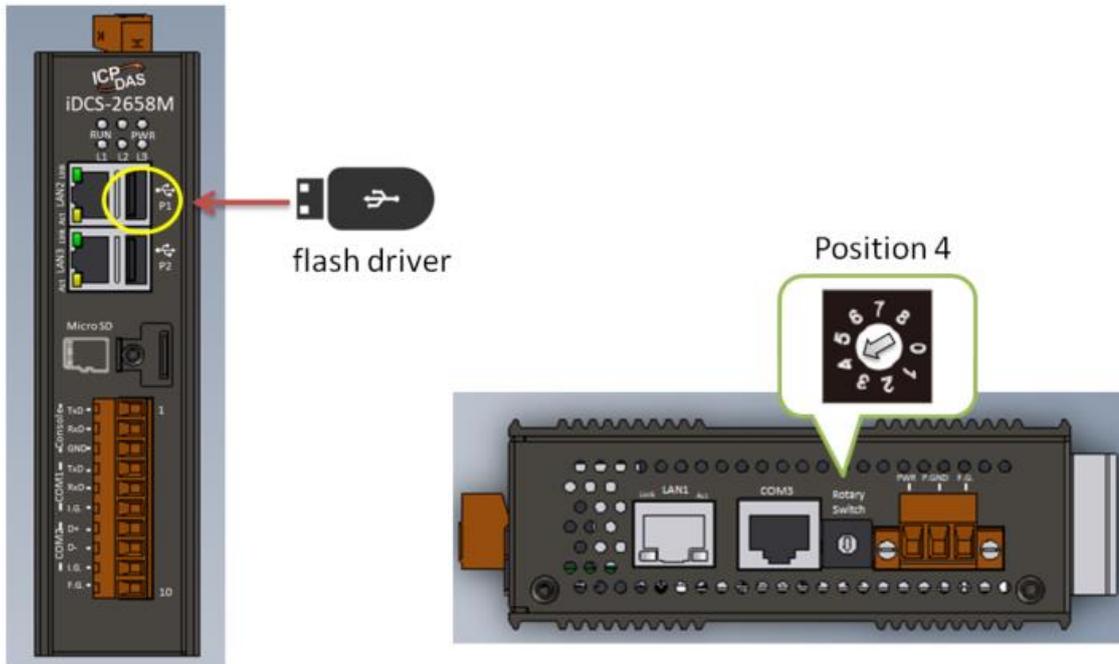

Step 3:

Turn the power on and the firmware update process will be executed automatically. When the firmware update is completed, the L1, L2, L3 LED will be on.
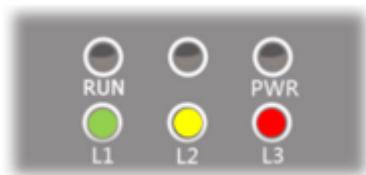

Step 4:

Power off and unplug your flash drive

Step5:

Power on again. It will show new firmware version in the console port and web page. It means firmware update is successful.

```
