# Multi-Serial Ports

Introduction

The AXP-9000/XP-9000 series controller supports N-Port modules, such as I-9114i, I-9144i, etc., with each module providing multiple serial ports. In this way, additional serial ports can be used in the AXP-9000/XP-9000 with the maximum number of serial ports available in the AXP-9000/XP-9000 expanded to 32. The AXP-9000/XP-9000 is a multi-tasking uint, therefore all the serial ports can be controlled simultaneously.

Applications

To get more RS-232/485/422 ports, user can plug one or more "multi serial port module" in the I/O slot.

ITEM	RS-232	RS-422/485	Isolation	Connector
I-9114i	4	-	2500 Vrms	DB-37 x 1
I-9144i	-	4	2500 Vrms	Terminator block x 1
