

IR Temperature Sensor iSN-81X Series

IIoT Applications for Distribution Cabinet Monitoring

iSN-812-MRTU

iSN-811C-MTCP

VPD-170-IRT

- HMI centralized management of remote sensors.
- Data logging analysis to achieve preventive maintenance.
- Non-contact measurement reduces process intervention.

» Features

Using thermal imaging technology to monitor the temperature inside the distribution cabinet. It is a new way to reduce inspection time and risks of abnormal stops.

VPD-170-IRT

iSN-81x-MRTU

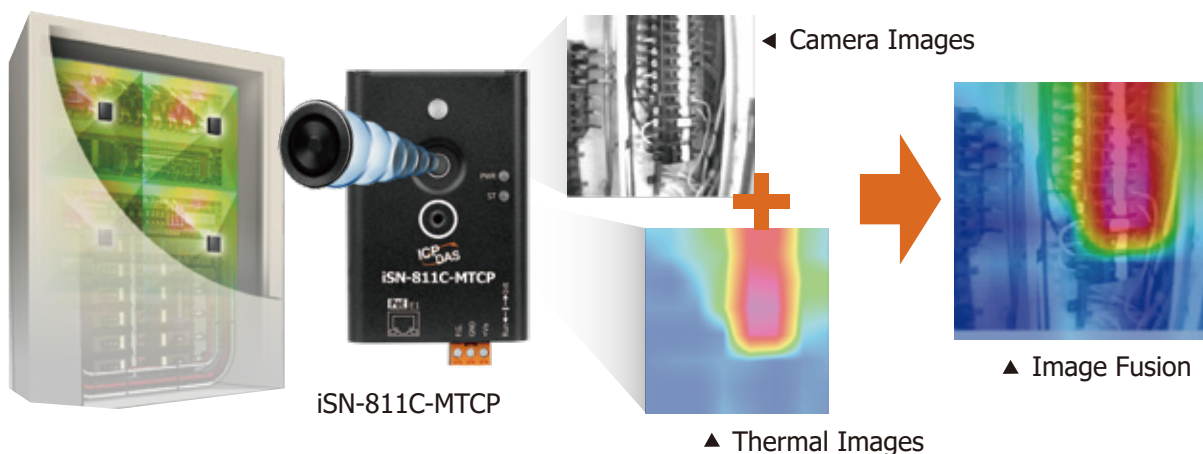

Data Concentrator

IR Temperature Sensing Module

Thermal Imaging + Real-time Streaming Determine Abnormal Conditions On-site

iSN-811C-MTCP is the first choice for detecting electrical anomalies, mechanical overheating, equipment inspections, and other troubleshooting tasks. It combines thermal imaging sensors and visible light cameras, offering integrated dual-image information for quicker problem detection.

Various installation options for various fields

Rail Mounting

Magnetic Mounting

Universal Holder

IRT Series Temperature Sensing

Supports Modbus / MQTT / RESTful Communication Protocols

Industrial Standards

Local Area Network

Centralized Management

IOT Standards

Send Proactively

Decentralized management

Cloud Storage

Cross-platform Applications

Decentralized Management

iSN-800 series integrates detection modules and WISE controllers, allowing the temperature measurement system to be expanded to include monitoring needs such as power, gas, and vibration. Abnormal alarm notification to grasp the on-site situation in real time.

» Production Line – Safety and Preventive

Temperature, vibration, and power monitoring reduce failures and defective products. Exceptions are sent to Line messages for immediate processing to reduce abnormal losses.

- iSN-811C-MTCP monitors the temperature and real-time image of equipment and distribution cabinet.
- Comprehensive monitoring of vibration (AR-300T), liquid leakage (iSN-104-E), and power (PM-2133D-MTCP).
- WISE-5231M-4GE sends abnormal messages for immediate processing.

Temperature Safety Monitoring Applications

» Warehouse-Safety and Protection

The stability of raw materials and logistics is closely related to product quality, and it is crucial to ensure the safety of the storage environment (low temperature, flammable materials, etc.).

- iSN-812-MRTU monitors warehouse and conveyor temperatures for secure raw material management.
- DL-302-IP65 performs environmental harmful gas detection.
- iSOS-100 emergency call links with the iSOS-ALM-Horn siren.

Control Box Temperature and Environment Monitoring

As functionality increased, machines and wiring inside the distribution cabinet have become more complex. Inconsistent inspections raise accident risks. To ensure safety and manage the machine room environment, IoT devices are used for real-time monitoring with zero downtime.

- Distribution cabinet Monitoring : The IRT sensor continuously monitors the temperature inside the case in a non-contact, large-area manner.
- Labor Management: Card swiping check-in and human body movement detection improve labor efficiency.
- Real-time Information : Real-time information and abnormal event notification.

In order to avoid heat disasters and downtime of machines caused by poor contact, aging, and damaged parts in electrical control board. ICPDAS provides in-panel monitoring, including temperature and power information collection, analysis, and alarms to avoid errors and effectively improve quality and utilization rate.

- Temperature Monitoring: Large-area temperature monitoring and real-time image transmission.
- Power Management: Data tracking and carbon emission basic data analysis.
- Cloud Application: IIoT communication server, combined with cloud and abnormal notification.

IR Temperature Sensing Modules

Model Name								
	iSN-811C-MTCP (With Camera)		iSN-811-MRTU		iSN-812-MTCP		iSN-812-MRTU	
IR Sensor								
Pixel	64 (8 x 8)				768 (32 x 24)			
Range	50°C~250°C				-40°C~300°C			
Accuracy/Resolution	±5°C Max. / 0.1°C							
Effective Distance	1m							
FOV <div>  </div>	X: 60° / D : S = 1 : 1.15 Y: 60° / D : S = 1 : 1.15				X: 110° / D : S = 1 : 2.86 Y: 75° / D : S = 1 : 1.53			
Camera								
Max. Resolution	QVGA (320 x 240)				--			
Fill light	Yes				--			
Interface								
Port	Ethernet, PoE		RS-485		Ethernet, PoE		RS-485	
Protocol	Modbus TCP / MQTT / RESTful		Modbus RTU		Modbus TCP / MQTT / RESTful		Modbus RTU	

IR Temperature Data Concentrator

	Model	VPD-170-IRT		
	Type	LCD 7" TFT (Resolution 800 x 480)	Buzzer/Reset Button	Yes
	Ports	RS-232 / RS-485 x 2 / RJ-45, 10/100 Base-TX	IP Rating	Front Panel: NEMA 4 / IP65
			Operating Temp	-10 ~ +60° C
	Protocol	Modbus RTU / Modbus TCP	Power	DC: +12 ~ 48 VDC / PoE: 48 VDC
	Relay	9 x Single Relay(Form A)	Humidity	10 ~ 90% RH, Non-condensing
