Q: Why the Email function is fails to send email with Google Gmail account?

Ans:

• Method A: Allow less secure apps in Google Gmail

- 1. Visit the Google "Less secure apps" page. (Users may be asked to sign in with Google account)
- 2. Open the [Allow less secure apps] switch on the page. Make it from OFF to ON to complete the setting, and then the WISE controller can use the Gmail account to send email now.

A "Generated app password" page will be displayed. Copy the app password in the yellow bar (16 character code) and paste it to the Gmail's password field on the "Email Setting" page (Advanced Setting → Email Setting → SMTP Server Setting → Authentication). Finally, click "DONE" button to complete the setting.
