

**Q: How do I backup WISE's setting and copy it to other WISE controllers?**

**A:**

Download "[WISE-52xx 224x Utility](#)" from download center, follow its Quick Start to install it, and refer to the section 4.3.2 "Rule Update/Backup" to backup the setting or copy the setting to other WISE controllers. The backup setting does **NOT** include "Time Setting", "Network Setting", "SNMP Setting", "Account Setting", and "Security Setting".

The screenshot displays the 'System Setting Page' for a WISE-5231 device. The interface includes a top navigation bar with 'System Setting' selected, and a sidebar menu on the left. The main content area is divided into several sections:

- Time Setting:** Includes Date & Time (Date: 2018/11/12, Time: 15:25:55) and Time Synchronization (Function Status: Enable, Sync Interval: 6 hours, Time Zone: UTC+08:00, Daylight Saving Time: Disable).
- Network Setting:** Includes LAN1 (IP: 192.168.100.175, Mask: 255.255.255.0, Gateway: 192.168.100.254, DNS: 168.95.1.1, MAC: 00-0D-E0-3E-5C-F5), Port (Web Server Port: 80, Modbus TCP Port: 502, Modbus NetID: 1), Dynamic DNS (Service 1: Disable, Service 2: Disable), and InTstar.
- Security Setting:** Includes Local FTP Server (Enable) and Idle Time (10 minute(s)).
- COM Port Interface Setting:** Includes COM2 (Function: Disable), COM3 (Function: Disable), and COM4 (Function: Modbus RTU Master, Baudrate: 115200 bps, Parity: None, Stop bits: 1, Silent Interval: 15 millisecond(s)).
- Firmware Update Setting:** Includes System Information (Serial Number: 01-48-47-06-18-00-00-37), Firmware Information (Current Version: 1.3.0, Available Version: Check), and Firmware Update (Firmware: [input field], Browse...).

The sidebar menu on the left, highlighted with a red box, contains the following items: Time Setting, Network Setting, SNMP Setting, Account Setting, Security Setting, and COM Port Interface Setting.
