

Q: About the LINE Notify service termination, how should we handle the need to send instant messages in the future?

A:

Please update the firmware of WISE-523x / WISE-224x to version v2.0.0 or later, and refer to [the user manual](#) to send messages using the LINE Messaging API or Telegram feature.

Existing users can also refer to this [document](#) to import LINE Notify settings into the LINE Messaging API or Telegram settings for quick setup of the new features.
