Precautions

Please read the following important instructions before getting started.

1. The iBPC Series isn't equipped with any storage devices (HDD/SSD/SD card etcs). Purchase a storage device that meets power consumption, temperature, and vibration requirements.

2. The iBPC Series isn't equipped with an operating system. An operating system must be installed on a storage device first before installing any software into the BoxPC.

2. Disconnect the power cord from the BoxPC before making any installation. Be sure both the system and the external devices are turned OFF. Sudden surge of power could ruin sensitive components. Make sure the BoxPC is properly grounded.

3. Make sure the power source matches the power rating of the BoxPC.

4. Turn OFF the system power before cleaning. Use a damp cloth instead of liquid or spray detergents for cleaning.

5. Do not leave this equipment in an uncontrolled environment where the storage temperature is below -40 $^{\circ}$ C or above 75 $^{\circ}$ C. It may damage the equipment.

6. Never open the equipment. For maintenance reasons or mounting the components, only a trained technician is allowed to do so. Most integrated circuits are sensitive to static electrical charge. To avoid damaging chips from electrostatic discharge, observe the following precautions:

- Before handling a board or integrated circuit, touch an unpainted portion of the system unit chassis for a few seconds. This will help to discharge any static electricity on your body.
- When handling boards and components, wear a wrist-grounding strap, available from most electronic component stores.

7. If any of the following situations arises, please the contact our service personnel: The power cord or plug is damaged.

- Liquid has penetrated into the device.
- The device has been exposed to moisture.
- The device is not working as expected or in a manner as described in this manual.
- The device has been dropped and damaged.
- Any obvious signs of damage displayed on the device.

1. Introduction

iBPC series is a fanless embedded box PC, wide operating temperature and wide range voltage capability, allow it run in the harsh environments.

iBPC series comes with the same interfaces: four RS-232/422/485 ports, VGA, HMDI, Audio, dual Gigabit Ethernet LAN ports and four high-speed USB 2.0. And there are various CPU options: iBPC-4081 is with one Intel® ATOM Quad Core 1.91Ghz Processor E3845 (with 4GB on-board memory).

Two SMA type connector opening for antenna, optional I/O expansion board (XV-board), provides high protection I/O, $+10 \sim 30$ VDC power input connector, and one power switch. One 2.5" SATA HDD drive bay is also set up in the embedded computer to possess sufficient storage.

1.1. Features

The BoxPC offers the most comprehensive configuration and remote system upgrade solutions to meet specific application requirements. The following list shows the hardware and software features designed to simplify installation, configuration and application.

Powerful Hardware Design

- iBPC-4081: Intel[®] Atom E3845 CPU (with 4 GB on-board memory)
- 2 × 10/100/1000M Ethernet and 4 × USB 2.0 port
- One 2.5" SATA drive bay and 1 CF socket
- Ultra-Rugged Construction and Reliable Design
- Supports VGA and HDMI dual display
- RS-232/422/485 port
- I/O Expansion Bus for XV-board
- One Mini PCI Express Card slot
- Operating Temperature: -25 ~ +70°C

Local I/O Expansion Board

iBPC series equips with an I/O expansion card, which allow youimplement various I/O functions.

Remote I/O Module and Expansion Unit

With the built-in RS-485 and Ethernet ports, iBPC series can connect RS-485/Ethernet remote I/O units (RU-87Pn/ET-87Pn) or modules (I-7000/M-7000/ET-7000).

Multiple Communication Interfaces

iBPC series provides different communication interfaces, easy to expand various I/O modules or connect to external devices.

- Ethernet
- RS-232/485 /422
- USB host
- CAN Bus

Various Memory Storage Options

iBPC series provides various memory storage options.

- CF card: Portable data logging applications.
- 2.5" SATA drive bay or Flash DOM (mini-PCIe): Rugged storage and shock absorption.

Highly Reliable Under Harsh Environment

iBPC series operates in a wide range of temperature and humidity.

- Operating Temperature: -25 ~ +70 °C
- Storage Temperature: -40 ~ +75 °C
- Humidity 10 ~ 90 % RH (non-condensing)

BOXPC User Manual Version1.0.1 Page: 8

1.2. Specifications

The table below summarizes the specifications of BoxPC.

Models	iBPC-4081	
System Software		
OS	Win7/Win8/Win10/WES7	
SDK Provided	DLL for VC, DLL for Visual Studio.Net	
CPU Module		
СРО	Intel [®] ATOM Quad Core 1.91Ghz Processor E3845	
BIOS	AMI	
SDRAM	4 GB DDR3	
MRAM	128 КВ	
HDD	One 2.5" SATA drive bay with active LED	
EEPROM	16 KB	
Memory Expansion	One CF socket	
RTC (Real Time Clock)	Provide second, minute, hour, date, day of week, month, year	
64-bit Hardware Serial Number	Yes, for software copy protection	
Dual Watchdog Timers	Yes	
Programmable LED Indicator	2 (L1, L2)	
Rotary Switch	Yes (0 ~ 9)	
I/O Expansion Slots		
I/O Expansion Bus	Yes, one optional XV-board	
PCI Express Mini Card	1	
VGA & Communication Ports		
VGA Resolution	1280 x 1024 to 1920 x 1080 for 16:9 display; 640 x 480 to 1024 x 768	
HDMI	for 4:3 display	
Ethernet Port	RJ-45, 10/100/1000M Base-TX (Auto-negotiating, Auto MDI/MDI-X,	
	LED indicators)	
USB 2.0	4	
COM1	Internal communication for XV-board series	
COM2	RS-232/485 (RxD, TxD and GND for RS-232; Data+, Data- for	
	RS-485); 3000 V _{DC} isolated	
COM3	RS-232 (RxD, TxD, CTS, RTS, DSR, DTR, CD, RI and GND); 3000 V_{DC}	
	isolated	
COM4	RS-232/485/422 (RxD, TxD, CTS, RTS and GND for RS-232; Data+,	
	Data- for RS-485, TX+/TX-/RX+/RX- for RS-422);3000 V _{DC} isolated	
BOXPC User Manual Version1.0.1 Page: 9		

COM5	RS-232/485/422 (RxD, TxD, CTS, RTS and GND for RS-232; Data+,	
	Data- for RS-485, TX+/TX-/RX+/RX- for RS-422);3000 $V_{\mbox{\tiny DC}}$ isolated	
Audio	Mic-in and Earphone-out	
Mechanical		
Dimensions (W x H x D)	254 mm x164 mm x74 mm	
Installation	Wall or DIN-rail mounting	
Ingress Protection	IP30 (Aluminum)	
Environmental		
Operating Temperature	-25 °C to +70 °C	
Storage Temperature	-40 °C to +75 °C	
Ambient Relative Humidity	10 % to 90 % RH (non-condensing)	
Power		
Input Range	+10 V_{DC} to +30 V_{DC} with 3-pin terminal block	
Isolation	1 kV	
Power Switch	Yes	
Consumption	18 W (0.75 A @ 24 V _{DC})	

1.3. Overview

The iBPC Series modules are equipped with several interfaces and peripherals that can be integrated with external systems. Here is an overview of the components and its descriptions.

BoxPC

BOXPC User Manual Version 1.0.1 Page: 11

The details of these items are as follows:

SMA Connector

The BoxPC has 2 SMA connectors that are usually used for GPS and WiFi antenna systems.

Rotary Switch

Rotary Switch is an operating mode selector that provides functions to configure with the selection of operating mode and authorization control.

Power Switch

The power switch enables or disables power to electric circuits and loads in the BoxPC.

Microphone-in and Earphone-out

The microphone-in and an earphone-out can be used to process the input and the output of sound.

Power Input

The Box has a 3-wire terminal block; there has 2-wire for the power input and a wire for the frame ground.

Connector for optional XV-board

The XV-board slot can be used to communicate with one XV-board. The XV-board can be used to implement various I/O functions such as DI, DO, A/D, D/A, Timer/Counter. For more information about these available expansion boards, please refer to<u>http://www.icpdas.com/root/product/solutions/hmi_touch_monitor/touchpad/xv-board_sel</u> <u>ection.html</u> service to expand the function.

CF Card Socket

The BoxPC comes with a CF card inside the CF socket. The CF card can be used to restore the BoxPC system or expand the memory up to 32 GB. (Shipped without any CF card)

Hard Drive Tray

BoxPC has a HDD tray that supports 2.5-inch disk drives and 2.5-inch flash drives.

BOXPC User Manual

The BoxPC has 2 COM ports that provide versatile communication types: RS-232, RS-422 and RS-485. The two DIP switches are used for assigning the communication types.

DIP1

DIP2

• Selecting communication interface (S3, S4)

	RS-232 (Default)		RS-422	RS-485
Switch	S3	ON	ON	OFF
Setting	S4	OFF	ON	On
Stat	tus	3 4	3 4	3 4

• Enable/Disable Pull-high/Pull-low resistors for RS-422/RS-485 (S1)

	Enable (Default)	Disable
Switch Setting	S1: ON	S1: OFF
Status	ON 1	ON 1

• Enable/Disable 120Ω termination resistors for RS-422/RS-485 (S2)

	Enable	Disable (Default)
Switch Setting	S2: ON	S2: OFF
Status	2	2

GbE LAN (L1 and L2)

The BoxPC has 2 Ethernet ports that can be used to connect the router to the Internet or to other devices.

BOXPC User Manual Versi

USB 2.0 (P1, P2, P3 and P4)

The BoxPC has 4 USB 2.0 ports that can be used to connect the USB devices such as mouse, keyboard or an external USB hard drive.

VGA Port

The BoxPC has a VGA port that can be used with a variety of supported VGA resolutions, and the output resolution covers, 1280 x 1024 to 1920 x 1080 for 16:9 display; 640 x 480 to 1024 x 768 for 4:3 display.

HDMI

The HDMI port can be used to connect BoxPCto TV or projector.

COM2 (RS-232/RS-485)

The COM2 port is a 9-pins RS-232/RS-485 connector. The details of the COM2 port specifications are shown to the side. Note:16C550 compatible Port Type:Male Baud Rate: 115200, 57600, 38400, 19200, 9600, 4800, 2400, 1200 bps Data Bits: 5, 6, 7, 8 Parity: None, Even, Odd, Mark (Always 1), Space (Always 0) Stop Bits: 1, 2 FIFO:64 bytes

COM3 (RS-232)

The COM3 port is a 9-pins RS-232 connector. The details of the COM3 port specifications are shown to the side.

Note:16C550 compatible Port Type: Male Baud Rate: 115200, 57600, 38400, 19200, 9600, 4800, 2400, 1200 bps Data Bits: 5, 6, 7, 8 Parity: None, Even, Odd, Mark (Always 1), Space (Always 0) Stop Bits: 1, 2 FIFO:128 bytes

BOXPC User Manual

COM4/COM5 (RS-232/RS-422/RS-485)

The BoxPC has 2 COM ports that provide versatile communication types:RS-232, RS-422 and RS-485. The pin assignments of these two COM port are shown as below. (Refer to page 13 and 14 for more hardware configuration information)

	COM4/COM5			
	RS-232 (Default)	RS-422	RS-485	
Pins	DSR CTS CTS CTS CTS CTS CTS CTS CTS	(C) TxD- TxD+ (C) (C) TxD+ (C) (C) TxD+ (C) (C) TxD+ (C) (C) TxD+ (C) (C) (C) (C) (C) (C) (C) (C) (C) (C)	© 1 Data- © 2 Data+ © 3 @ © 5 GND	
1	DCD	TxD-	Data-	
2	RxD	TxD+	Data+	
3	TxD	RxD+	-	
4	DTR	RxD-	-	
5	GND	GND	GND	
6	DSR	-	-	
7	RTS	-	-	
8	CTS	-	-	
9	-	-	-	

LED Indicators

The BoxPC has 4 LED indicators. The details of these LED indicators are as follows:

LED Indicator	Color	Description
L1/L2	Red	LED indicators controlled by userprogram.
PWR	Green	System has power applied to it.
HDD	Green	HDD is accessed.

BOXPC User Manual

1.4. Dimensions

The diagrams below provide the dimensions of the BoxPC to use in defining your enclosure specifications. Remember to leave room for potential expansion if you are using other components in your system. All dimensions are in millimeters.

1.5. Companion CD

This package comes with a CD that provides a collection of the software utility, documentation, drivers, demo program and application. The CD contains several subdirectories. All of them are listed below.

2. Getting Started

This chapter provides a guided tour of the BoxPC installation and configuration that describes the steps needed to download, install, configure, and run the basic procedures for user working with the BoxPC for the first time.

Before starting any task, please check the package contents. If any of the following package contents are missing or damaged, contact your dealer, distributor.

iBPC-4081

Quick Start Guide

44 mm DIN-Rail Clip

2.1. Mounting the BoxPC

The BoxPC can be mounted either directly to a wall/panel, or onto a stainless 35mm DIN rail.

DIN Rail mounting

Step 1: Fasten the DIN rail clip to the BoxPC with the screws (M3x 6L)

BOXPC User Manual Version1.0.1 Page: 19

Step 2: Clip the device onto a stainless DIN rail

A stainless steel DIN rail is recommended.

Tips & Warnings

For DIN rail mounting, it is strongly recommended that only a stainless steel DIN rail be used to support the weight of BoxPC system, providing stability and preventing BoxPC from leaning

BOXPC User Manual Version 1.0.1 Page: 20

2.2. Deploying a Basic BOX-PC System

The BOXPC provides a variety of communication interface to suit a range of application. Here is a simple application for using the BoxPC.

- Step 1: Connect the positive terminal (+) of the power supply to the terminal <u>PWR1/2</u> and the negative terminal (-) of the power supply to the <u>P.GND</u>
- Step 2: Connect the USB mouse or the USB keyboard to the USB port
- Step 3: Connect the monitor to the VGA port
- Step 4: Connect to PC or the laptop to the LAN port via an Ethernet switch

2.3. Mounting a HDD

BoxPC has a HDD tray that supports 2.5-inch disk drives and 2.5-inch flash drives.

Step 1: Remove the 2drive screws to take out the HDD tray

BOXPC User Manual Version1.0.1 Page: 22

2.4. Mountinga XV-board

BoxPC has one expansion I/O slots to expand the functions. For more detailed information about the XV-board specifications, please refer to Appendix B. XV-Board Modules.

Step 1: Remove cover screws to remove the cover

Step 2: Hold the XV-board vertically and align the socket, and then carefully press the XV-board

Step 3: Close the cover and then fasten the screws

Step 4: Insert the I/O terminal and then stick the I/O sticker

BOXPC User Manual Version1.0.1 Page: 24

2.5. Inserting a Mini PCIe

iBPC series supports 1 Mini PCIe slot.

Step 1: Remove cover screws to remove the cover

Step 2: Slide the Mini PCIe module into the mini PCIe slot

Step 3: Make sure the mini PCIe and slot screw holes align, and then attach the 2 screws (M2.6 x 4L)

Step 4: Close the cover and then fasten the screws

BOXPC User Manual Version1.0.1 Page: 26

2.6. Adding an External Antenna

The BoxPC has two antenna connectors for the WIFI module of mini PCIe. Since the housing is locked. It is difficult for the user to mount the cable to the antenna by himself/herself so the preset has already been installed in the housing. On the installed cable, one side is the antenna and the other side is the connection hole for the cable to be placed.

The BoxPC has two cables which mount on the PCB of the BoxPC like below.

After you insert a WIFI module of mini PCIe (you can refer to the chapter 2.5 Inserting a Mini PCIe), you need attach the cable on the mini PCIe module like below, and mount wireless antenna, then you can use the WIFI module at BoxPC.

3. BIOS Setup

BoxPC is equipped with the AMI BIOS stored in Flash ROM. These BIOS has a built-in Setup program that allows users to modify the basic system configuration easily. This type of information is stored in CMOS RAM so that it is retained during power-off periods. When system is turned on, BoxPC communicates with peripheral devices and checks its hardware resources against the configuration information stored in the CMOS memory. If any error is detected, or the CMOS parameters need to be initially defined, the diagnostic program will prompt the user to enter the SETUP program. Some errors are significant enough to abort the start up.

Entering Setup -- Launch System Setup

Power on the computer and the system will start POST (Power On Self Test) process. When the message below appears on the screen, press <**Del**> key will enter BIOS setup screen.

Press to enter SETUP

If the message disappears before responding and still wish to enter Setup, please restart the system by turning it OFF and On. It can be also restarted by pressing <Ctrl>, <Alt>, and <Delete> keys on keyboard simultaneously.

Press <F1> to Run General Help or Resume

The BIOS setup program provides a General Help screen. The menu can be called up from any menu by pressing <F1>. The Help screen lists all the possible keys to use and the selections for the highlighted item. Press <Esc> to exit the Help screen.

	——— General Help ————

BOXPC User	Manual Version101 Page: 28

How to recovery the BIOS setting

If it isn't necessary, recommended that you should avoid changing the chipset's defaults. Changing the settings may cause some problems. If there is a situation where you cannot reboot, you want to recovery the BIOS setting to the original settings.

Recovery the BIOS settings, you need close the power of BoxPC and uninstall the battery from BoxPC, then want about 10~15 seconds and install the battery. After that, you will get an original BIOS setting.

About uninstalling/installing the battery, you can refer to the chapter Appendix D.

Main

Use this menu for basic system configurations, such as time, date etc.

System Date

View or set system date.

The date format is <Day>, <Month><Date><Year>. Use [Tab] to select<Day>, <Month>,<Date> and <Year>. Use [+] or [-] to configure system Date.

System Time

View or set system time.

The time format is <Hour><Minute><Second>. Use [Tab] to select <Hour >, <Minute > and <Second >. Use [+] or [-] to configure system Time.

Boot to EFI Shell

4. Driver & Software installation

This chapter provides a brief introduction of drivers and utility tools installation for the BoxPC.

There are several tools and drivers designed for BoxPC. All of these are installed on BoxPC after OS installation and can work directly on BoxPC.

Tools for working with PC can be found separately on the CD that was provided with the package or by downloading the latest version from the ICP DAS web site.

CD:\BoxPC\

4.1. Driver installation

Before installation tools, you need to install the driver first to prepare device running. All the drivers for BoxPC can be found on CD or downloaded the latest version from the ICP DAS web site.

CD:\BoxPC\drivers\ibpc-4081\X86\ or

CD:\BoxPC\drivers\ibpc-4081\X64\

4.1.1. Installing Driver

Different versions of Windows require different drivers. Please install Windows OS, and then follow the sequence below to install the drivers.

Refer to the installation order and check what driver you need install for the Windows OS. The applications will use administrator account by themselves, so you just need to open these applications.

Installation order	Name	Path	OS
1	Chipset	CD:\BoxPC\driver\ibpc-4081\x86\Chipset\ChipSet Driver.zip	Windows 7/8/10 X86 (32bit)
1	Driver	CD:\BoxPC\driver\ibpc-4081\x64\Chipset\ChipSet Driver.zip	Windows 7/8/10 X64 (64bit)
		CD:\BoxPC\driver\ibpc-4081\x86\Graphics \WIN7\Graphics Driver.zip	Windows 7 X86 (32bit)
2	Graphics	CD:\BoxPC\driver\ibpc-4081\x64\Graphics \WIN7\Graphics Driver.zip	Windows 7 X64 (64bit)
2	Driver	CD:\BoxPC\driver\ibpc-4081\x86\Graphics \WIN8WIN10\Graphics Driver.zip	Windows 8/10 X86 (32bit)
		CD:\BoxPC\driver\ibpc-4081\x64\Graphics \WIN8WIN10\Graphics Driver.zip	Windows 8/10 X64 (64bit)
2		CD:\BoxPC\driver\ibpc-4081\x86\LAN\ LAN Driver.zip	Windows 7/8/10 X86 (32bit)
5		CD:\BoxPC\driver\ibpc-4081\x64\LAN\ LAN Driver.zip	Windows 7/8/10 X64 (64bit)
,		CD:\BoxPC\driver\ibpc-4081\x86\Audio\Audio Driver.zip	Windows 7/8/10 X86 (32bit)
4	Audio Driver	CD:\BoxPC\driver\ibpc-4081\x64\Audio\Audio Driver.zip	Windows 7/8/10 X64 (64bit)
5	IO Driver	CD:\BoxPC\driver\ibpc-4081\x86\IO\ WIN7\IO Driver.zip	Windows 7 X86 (32bit)
BOXPC User Ma	nual	Version1.0.1 Page: 54	

		CD:\BoxPC\driver\ibpc-4081\x64\IO\ WIN7\IO Driver.zip	Windows 7 X64 (64bit)
		CD:\BoxPC\driver\ibpc-4081\x86\IO\ WIN8\IO	Windows 8 X86
		Driver.zip	(32DIT) Windows 8 X64
		Driver.zip	(64bit)
		CD:\BoxPC\driver\ibpc-4081\x86\USB3.0\ LAN	Windows 7 X86
c	USB3.0	Driver.zip	(32bit)
U	Driver	CD:\BoxPC\driver\ibpc-4081\x64\USB3.0\ LAN	Windows 7 X64
		Driver.zip	(64bit)
		CD:\BoxPC\driver\ibpc-4081\x86\TXE\ TXE	Windows 8/10
_		Driver.zip	X86 (32bit)
/	TXE Driver	CD:\BoxPC\driver\ibpc-4081\x64\TXE\ TXE	Windows 8/10
		Driver.zip	X64 (64bit)
		CD:\BoxPC\driver\ibpc-4081\x86\ICPDAS\	Windows
		BP_Win_setup_1.0.0_1000.exe	7/8/10 X86
o	ICPDAS		(32bit)
o	Driver	CD:\BoxPC\driver\ibpc-4081\x64\ICPDAS\	Windows
		BP_Win_setup_1.0.0_1000.exe	7/8/10 X64
			(64bit)

Double click the application from the specified path, then follow the instructions, you will finish the installation.

Please read 4.1.2 Installation ICPDAS Driver and follow the steps, when you install the ICPDAS Driver.

4.1.2. ICPDAS Driver Installation

If OS installed on BOXPC is Windows 7 64 bit, it's first to install the windows updates, KB3033929 and KB3035131.If you don't install two windows updates, you will get a bug while installing ICPDAS driver. Please install KB3035131 at first, then install KB3033929, you can find the path at the following table or download from Microsoft web site.

Name	Path	OS
KB3033929	CD:\BoxPC\update\Windows6.1-KB3033929-x64.msu	Windows 7 X64(64 bit)
KB3035131	CD:\BoxPC\update\Windows6.1-KB3035131-x64.msu	Windows 7 X64(64 bit)

It doesn't install two windows updates above in BOXPC with Windows/Windows 10.

Install ICPDAS driver

Double click the BP_Win_setup_1.0.0_1000.exe file, you will see the application's window like the following picture, press next to the next step.

Don't change the path of the installation software, or you will get a problem from it.

ß	Setup - BOXPC series driver Driver – 🗆 🗙
	Select Destination Location Where should BOXPC series driver Driver be installed?
	Setup will install BOXPC series driver Driver into the following folder.
	To continue, click Next. If you would like to select a different folder, click Browse.
	C:\ICPDAS Browse
	At least 2.6 MB of free disk space is required.
	Next > Cancel

Check the path and press install to next step.

B	Setup - BOXPC series driver Driver -		×
R	eady to Install Setup is now ready to begin installing BOXPC series driver Driver on your computer.	(()	
	Click Install to continue with the installation, or click Back if you want to review or change any settings.		
	Destination location: C:\ICPDAS	^	
	<	~	
		Canc	-
		Cano	

Start installing and wait.

Setup - BOXPC series driver Driver		×
Installing Please wait while Setup installs BOXPC series driver Driver on your computer.		J.
Extracting files C:\ICPDAS\Driver\Win2k\driver\X64\DPInst64.exe		
	Cano	el

Check the creation success like red Box at following picture, then press any key to continue install. Because there have two commands need to work, so you would do it twice.

Start to install the Drivers, please checked "Always trust software from "ICP DAS Co., Ltd."" check box and press the Install button.

Finally, check Yes to restart the computer and press the Finish to finish installation.

19 Setu	Setup - BOXPC series driver Driver 🛛 – 🗖 📉 🗙		
	Completing the BOXPC series driver Driver Setup Wizard To complete the installation of BOXPC series driver Driver, Setup must restart your computer. Would you like to restart now? • Yes, restart the computer now • No, I will restart the computer later		
	Einish		

4.2. PAC Utility installation

PAC Utility is a collection of software applications that show information of BoxPC system. You must install this first when you want to use our applications or tools.

You find on CD or downloaded the latest version from the ICP DAS web site.

CD:\BoxPC\Tools\

4.2.1. Installing PAC Utility

You can find the setup file at the following table, start the setup file, follow the instructions, and then it will show you system information.

Name	Path	OS
PAC Utility	CD:\BoxPC\tools\PACUtility\PAC_Utility setup.exe	Windows 7/8/10
Notice: please check	ed "create a desktop shortcut" , if you not checked, yo	u need open the PAC

Utility at the Path : C:\ICPDAS\Utility\PAC Utility\PAC_Utility.exe

15	Setup - PAC_Utility - 🗆 🗙
	Select Additional Tasks Which additional tasks should be performed?
	Select the additional tasks you would like Setup to perform while installing PAC_Utility, then click Next.
	Additional shortcuts:
	Create a desktop shortcut
	< Back Next > Cancel

The System Information tab provides functions to monitor necessary device information of BoxPC.

🏽 PAC Utility V1.0.9.0 2017/06/22			_		\times

For more detailed information about DCON_Utility_Pro, please refer:<u>http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon_utility/manual/</u>

5. APIs and Demos

This chapter provides a brief overview of PAC APIs and demos that have been designed for BoxPC.

ICP DAS provides a set of demos in different programming languages. You can examine the demo codes, which includes numerous comments, to familiarize yourself with the PAC APIs. This will allow developing your own applications quickly by modifying these demo programs.

For full usage information regarding the description, prototype and the arguments of the functions, please refer to the "PAC Standard API Manual"

BOXPC User Manual

Version1.0.1 Page: 64

5.1. PAC Standard APIs

The diagram below shows the set of each system operation API provided in the PACSDK.

5.1.1. C# Demos for PAC Standard APIs

The PAC SDK includes the following demos that demonstrate the use of the PAC Standard APIs in a C# language environment. The following demos can be found on the CD that was provided with the package or by downloading the latest version from ICP DAS web site.

For C# applications, these demo programs can be obtained from:

CD:\BoxPC\demo\X86\iBPC\csharp.net\Standard\windows_forms\

CD:\BoxPC\demo\X64\iBPC\csharp.net\Standard\windows_forms\

http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/ibpc/csharp.net/standard/windows_forms/ http://ftp.icpdas.com/pub/cd/boxpc/demo/x64/ibpc/csharp.net/standard/windows_forms/

Folder	Demo	Explanation
deviceinformation	DeviceInformation	Retrieves information about the
getrotaryid	GetRotaryID	Retrieves information about the status of the rotary switch
memory	Memory	Shows how to read/write data values from/to the EEPROM or the backplane of the MRAM
uart	UART	Shows how to read the name of a local I/O modules via a UART
watchdog	WatchDog	Displays information about how to operate the watchdog

5.1.2. Visual C++ Demos for PAC Standard APIs

The PAC SDK includes the following demos that demonstrate the use of the PAC Standard APIs ina Visual C++ language environment. The following demos can be found on the CD that was provided with the package or by downloading the latest version from ICP DAS web site.

For Visual C++ applications, these demo programs can be obtained from:

CD:\BoxPC\demo\X86\ibpc\vc\standard\

CD:\BoxPC\demo\X64\ibpc\vc\standard\

http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/ibpc/vc/standard/ http://ftp.icpdas.com/pub/cd/boxpc/demo/x64/ibpc/vc/standard/

Folder	Demo	Explanation

	through a COM port.
7K87K_di(MF)	Shows how to read the DI values of DI module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_di_cnt(MF)	 Shows how to read the DI values of DI module and reads the counts of the DI channels of the DI module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_dio(MF)	Shows how to read the DI and the DO values of the DIOmodule. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_do(MF)	Shows how to write the DO values to DO module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_do_poweron_safe(MF)	Shows how to write/read three values of DO module, the DO values, the DO power on value and the DO safe value. Also shows how to enables/disables the WDT and sets WDT timeout value of module. This demo program is used by 7K or 87K series DO modules which connected through a COM port.
7K87K_PWM	Shows how to set/read four things for a specific channel, the frequency values, the duty cycle values, the PWM step value and the continuous mode. Also shows how to save the PWM configuration, and reads the status of the PWM output port and the digital input port. This demo program is used by 7K or 87K series DO modules which connected through a COM port.

5.2.2. Visual C++ Demos for PAC Expansion I/O

The PAC SDK includes the following Demos that demonstrate the use of the PAC IO APIs in a Visual C++ language environment.

The following Demos can be found on the CD that was provided with the package or by downloading the latest version from ICP DAS web site.

For Visual C++ applications, these demo programs can be obtained from:

CD:\BoxPC\demo\ibpc\X86\vc\io\

CD:\BoxPC\demo\ibpc\X64\vc\io\

http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/ibpc/vc/io/ http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/ibpc/vc/io/

Floder	Demo	Explanation
Remote	7K87K_ai	Shows how to read the AI values of AI module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
	7K87K_ao	Shows how to write the AO values to AO module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
	7K87K_ao_poweron_safe	Shows how to write/read three values of AO module, the AO values, the AO power on value and the AO safe value. Also shows how to enables/disables the WDT and sets WDT timeout value of module. This demo program is used by 7K or 87K series AO modules which connected through a COM port.
	7K87K_Basic	Shows how to send/receive a command/response application. This demo program is used by 7K or 87K series modules which connected through a COM port.
	7K87K_cnt	Shows how to reads the counter values of the counter/frequency modules. This demo program is used by 7K or 87K series modules which connected through a COM port.
	7K87K_di(MF)	Shows how to read the DI values of DI module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
BOXPC User	Manual Version1.0.1	Page: 71

7K87K_di_cnt(MF)	Shows how to read the DI values of DI module and reads the counts of the DI channels of the DI module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_dio(MF)	Shows how to read the DI and the DO values of the DIOmodule. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_do(MF)	Shows how to write the DO values to DO module. This demo program is used by 7K or 87K series AI modules which connected through a COM port.
7K87K_do_poweron_safe(MF)	Shows how to write/read three values of DO module, the DO values, the DO power on value and the DO safe value. Also shows how to enable/disable the WDT and sets WDT timeout value of module. This demo program is used by 7K or 87K series DO modules which connected through a COM port.
7K87K_PWM	Shows how to set/read four things for a specific channel, the frequency values, the duty cycle value ,the PWM step value and the continuous mode. Also shows how to save the PWM configuration, and read the status of the PWM output port and the digital input port. This demo program is used by 7K or 87K series DO modules which connected through a COM port.
6. I/O Modules and SDK Selection

This chapter describes how to select a suitable I/O expansion module and the corresponding SDK library to be used for developing programs on BoxPC series devices.

The following table shows the path of PACNET.dll and PACSDK.dll.

	File	Path
		CD:\BoxPC\sdk\X86\PACNET\
PACINET.UII		CD:\BoxPC\sdk\X64\PACNET\
		CD:\BoxPC\sdk\X86\PACSDK\
PACSDR.ull		CD:\BoxPC\sdk\X64\PACSDK\

Selecting a SDK Library for I/O Expansion

Local I/O Module (XV-Board)

There are more than 8 XV-Board available for expanding the function of the BoxPC The following table shows the appropriate SDK library to be used for I/O modules.

Module	Native SDK	.NET CF SDK	
XV-Board	Modbus Demo	Modbus Demo	

For more detailed information about these support modules, please refer to:

http://www.icpdas.com/root/product/solutions/hmi_touch_monitor/touchpad/xv-board_selection_n.html

2 RS-485 (I-7000 series and M-7000 series)

I-7000, M-7000, RU-87Pn and high profile I-87K series modules connect to iBPC series devices via a twisted-pair, multi-drop, 2-wire RS-485 network.

> I-7000 series I/O modules

Module	Native SDK	.NET CF SDK	
I-7000 series	PACSDK.dll	PACNET.dll	

For full details regarding I-7000 series I/O modules and its demos, please refer to: http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/ibpc/applicabled_demo_for_7k_module.pdf

M-7000 series I/O modules

Module	Native SDK	.NET CF SDK	
M-7000 series	Modbus Demo	Modbus Demo	

For more detailed information about M-7000 series modules using Modbus protocol and its demos, please refer to:

http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/nmodbus/

RU-87Pn + I-87K series I/O modules

Module	Native SDK	.NET CF SDK
RU-87Pn + I-87K	PACSDK.dll	PACNET.dll

Other specified I/O

Module	Native SDK	.NET CF SDK
I-7088W	PACSDK.dll	PACNET.dll

BEthernet (ET-7000 series and I-8KE4/8-MTCP)

The Ethernet I/O devices available include ET-7000 and I-8KE4/8-MTCP, and support the Modbus/TCP communication protocol.

Module	Native SDK	.NET CF SDK	
ET-7000	Modbus Demo	Modbus Demo	
I-8KE4/8-MTCP	Modbus Demo	Modbus Demo	

For more detailed information about ET-7000 and I-8KE4/8-MTCP series modules using Modbus protocol and its demos, please refer to:

http://ftp.icpdas.com/pub/cd/boxpc/demo/x86/nmodbus/

Notice!

If you try to build demos, please select same platform target and dll file, you can choose it at properties of Visual Studio 2008, and you can see the page like blow, select x86 or x64 at platform target, then start build it.

If you use tow demo of different platform target at x64 OS, which is very easy to make mistakes. So, you can use x86 demos at x86 OS, and use x86 or x64 demos at x64 OS, but recommended not to use x86 and x64 demos at x64 OS at the same time.

Application	Configuration: Active (Release) Platform: Active (Any CPU)
Build	
Build Events	General
Debug	Conditional compilation symbols:
Resources	Define DEBUG constant
	Define TRACE constant
Services	Platform target: x86 ▼
Settings	✓ Allow unsafe code
Reference Paths	☑ Optimize code

7. BoxPC Download Center

This chapter provides a brief introduction of the BoxPC download center.

BoxPC has a download center where you can access the latest version of the software, tools, demo programs, and related information.

The BoxPC Download Center can be found at:

http://www.icpdas.com/root/support/download/pac/ibpc/ibpc download pacsdk.html

Before you download any program, please read the notes of each online program first to avoid the confused situation. The published date and indicated requirement of a program can help user to						
determine the co	mpatibility for your iE	3PC-4081.

Appendix

A. XV-Board Modules

The XV-board series are for iBPC-4081.

One PAC can only plug only one XV-board. The XV-board series have following common specification:

DI channel is dry contact, sink type.

• DO channel is open collector, sink type.

DIO Expansion

Model		DI		DO		
woder	Channel	Type Sink/Source		Channel	Sink/Source	
XV107	0	Source	Source	0	Sink	
XV107A	8	wet	Sink	ŏ	Source	
XV110	16	Dry/Wet	Sink/Source	-	-	
XV111				16	Sink	
XV111A		-			Source	

Relay Output Expansion

Madal	DI			Relay Output	
iviodei	Channel	Channel Type Sink/Source		Channel	Туре
	_			2	Signal Relay
XV110	5	wet	Sink/Source	4	Power Relay

Multi-Function Expansion

NA solution	AI	AO	DI			DO	
Iviodei	Cha	nnel	Channel	Туре	Sink/Source	Channel	Sink/Source
XV306	4	-	_		Sink/Source	4	Relay, FormA, 6A
XV307	-	2	4	wet			
XV308	8	-	DI+DO=8		Source	DI+DO=8	Sink
XV310	4	2	4	Dry/wet	Sink	4	Source

For more detailed information about these support modules, please refer to

http://www.icpdas.com/root/product/solutions/hmi touch monitor/touchpad/xv-board selectio n.html

BOXPC User Manual

Version1.0.1 Page: 78

B. Using DCON Utility Pro to Configure I/O Modules

DCON Utility Pro is a tool kit designed to quickly control and manage XV-Board series expansion I/O modules.

- 1. Click the DCON Utility Pro shortcut on the desktop
- 2. Click the Comport option button, and select setting, I want to search XV-board this time, so I select COM1.
- 3.check what you need to select or change, and press the "ok" button.

CON Utility Pro V 2.0.0.9	X
Start Address (
COM Port Timeout	-
ID Address COMA

COM2 necksum Format	
COM3	
☑ 9600 □ 4800 □ 2400 □ 1200	
OK Cancel	
Cuncer	
COM:4	
COM:4	

4. Click the Search button

5. Click the module name to configure the XV-Board series module

C. How to change the battery

The BoxPC device is equipped with a Li-ion battery to ensure that any data stored in the BIOS setting is retained if a power loss occurs. The batteries supply continuous power to the store chip enabling the data to be retained for up to 7 years. The BoxPC will lose data, when the battery is removed, if you don't want losing data, you need remember the setting which you changed, and recover the setting after you replace the battery. And please care when you replace the battery, it is dangerous at power up of the BoxPC.

The following figures show the location of the battery installed on the BoxPC device.

Checking the current battery power level:

- 1. Run the PAC Utility and check the battery in the System Information. These fields indicate the current status of battery. If the power level of the battery is shown as low, battery should be replaced.
- 2. When creating a custom application, call the pac_GetBatteryLevel() API function in the PACSDK.dll to check the power level of the batteries. If the power of the battery shown as low, it is recommended that battery is immediately replaced.

• Replacing the batteries

- Power off the BoxPC device.
- Remove the cover.
- Remove the battery with Screw Driver.
- Insert a new battery.
- Power on the BoxPC device.

Ordering information:

Battery type: BR2032 (the ICPDAS part number is 2LB004 for ICP DAS) For more detailed information, contact your local sales office or distributor

D. How to update the .NET Framework 3.5

There have two ways to update the .NET Framework 3.5, on-line and off-line.

On-line update:

1. Open the Control Panel, and open the Program item, click the Turn Windows features on or off, you will see the picture below andcheck the .NET Framework 3.5 and press OK.

2. You will see the picture below, select the first option, and waitit to finish the update.

Off-line update:

You need to insert the device (CD or USB) of OS installation, check the disk number, and open the command with administrator account, type "dism.exe /online /enable-feature

/featurename:netfx3 /Source:X:\sources\sxs", "X:\" is the disk number, wait it to finish the update, and you will see the picture of command below.

E. Revision History

This chapter provides revision history information to this document.

The table below shows the revision history.

Revision	Date	Description
V1.0.1	Aug. 2018	Initial issue
