How to change the display type for WinPAC when the display on the current monitor is out of range

Appli	ies to:		
	Platform	OS Version	PAC Utility Version
	WinPAC	All Versions	All Versions

The default display resolution of WinPAC is "800*600". If the settings on your monitor are out of range, you are still able to change the display resolution and frequency with the VCEP – a remote control tool.

Here we illustrate how to connect the WinPAC via LAN.

Step 1: Connect both the PC client and the WinPAC to a valid LAN.

Step 2: Install the VCEP client on your PC client.

The "vcep_4.2.0.7.exe" file is located at

Companion

ftp://ftp.icpdas.com/pub/cd/winpac/napdos/wp-8x4x_ce50/pc_tools/vcep_4.2.0.7/

Step 3: Execute the Pac Utility. Set the \System_disk\tools\VCEP\v_remote.exe auto execution after reboot.

Step5: Change the display resolution.

5.1. Start the PAC Utility on the desktop, select the display resolution and frequency you want then press the "**Apply**" button.

Step 6: Reboot your WinPAC.

- 6.1. Click the "File" → "Reboot" menu option.
- 6.2. Click the "Yes" button and wait for the device to reboot.
