How to record I-8017H 's Ch.1 to Ch.4 voltage input in S-256/512 on I-8437-80 or I-8837-80 ? The sampling time is one record every 0.05 second. The record period is 1 to 10 minutes. Then PC can download this record and display it as a trend curve diagram by M.S. Excel?

[Download FAQ-058 Demo.](#)

This demo is the "Demo_71" can run in I-8437-80 or in I-8837-80 (80MHz). The PAC driver should be version of 3.19 or later version. Visit to the webpage to download files.

Driver:

<http://www.icpdas.com/en/download/show.php?num=368&nation=US&kind1=&model=&kw=isagraf>

Demo:

<http://www.icpdas.com/en/download/show.php?num=1005&nation=US&kind1=&model=&kw=isagraf>

ISaGRAF FAQ:

<http://www.icpdas.com/en/faq/index.php?kind=280#751> (FAQ-058)

I-8437-80 and I-8837-80 PAC's CPU is running at 80MHz. The speed is about 2 to 4 time faster than I-8437 and I-8837 (40MHz CPU). So it can record minimum to 25 milli-second sampling data. While using I-8437 and I-8837 (40MHz) , it can record only 100 ms or above sampling data. This minimum sampling time depends on your ISaGRAF program's PLC scan time. If the PLC scan time is large, like 200ms, then you can do sampling only larger than 200 ms.

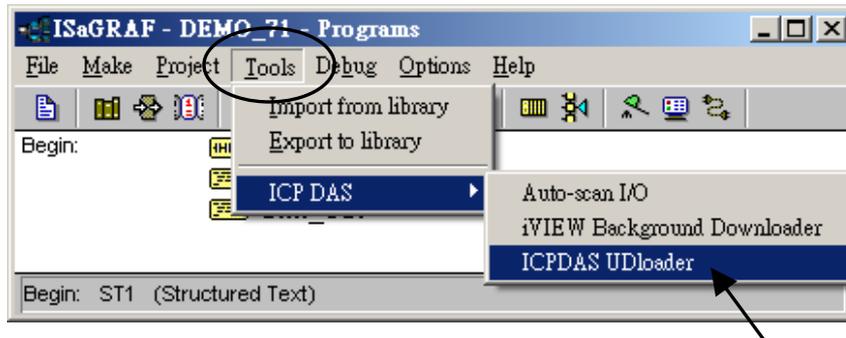

How to test this demo ?

You may run VB 6.0 - "Demo_6" in your PC to on-line control this I-8837-80 via ethernet . Or just push the pushbutton on the front panel of the I-8437-80/8837-80 to start/stop it.

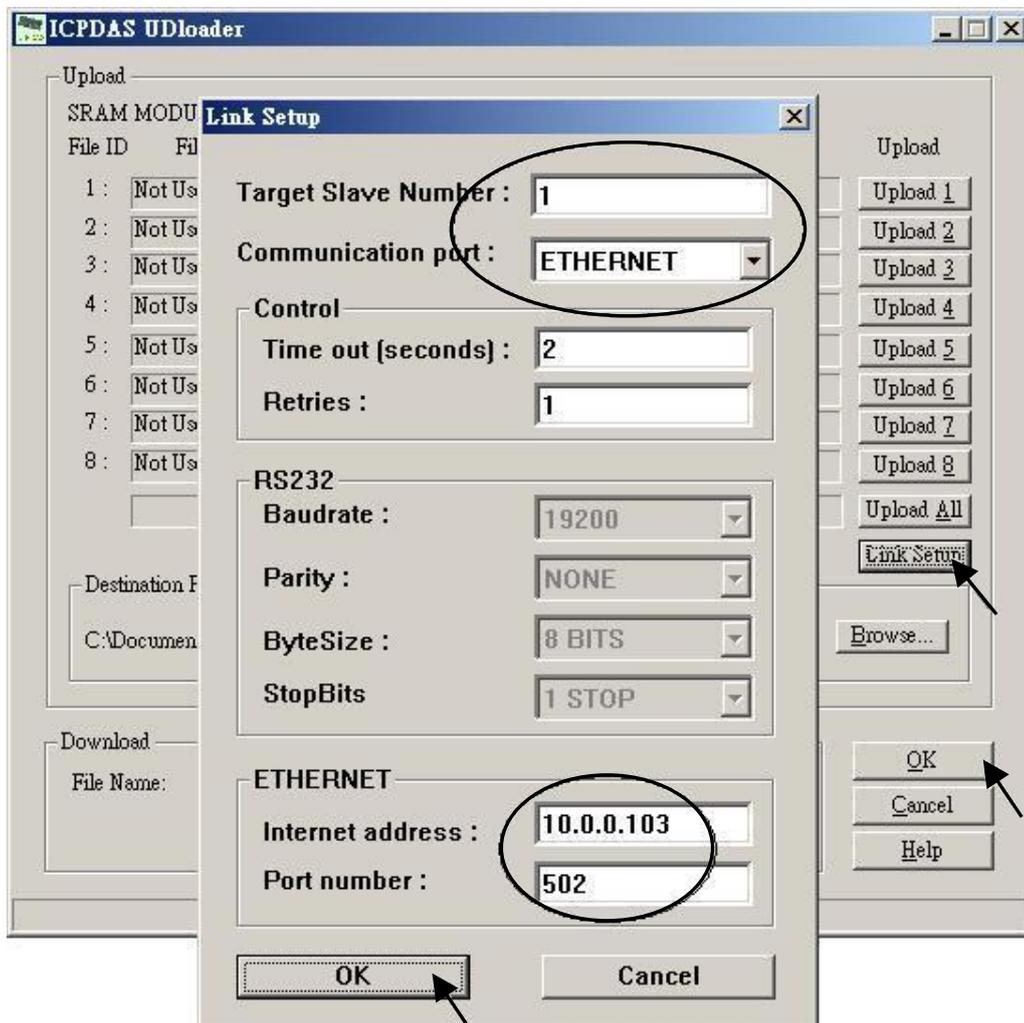

1. Please plug one I-8024 in I-8437-80 's Slot 2, one I-8017H in Slot 3. (Note: the left-most I/O slot No. of the I-8xx7 is 0 , not 1) .Then connect Ch1. to Ch.4 voltage output of I-8024 to Ch1. to Ch.4 of I-8017H. Then power up this I-8437-80.
2. Download the ISaGRAF project - "Demo_71" to the I-8437-80 .
3. At run time, you may press pushbutton 1 to start recording. Then it will record data during 2 minutes. You can see the displayed number on the front panel decreasing to 0 and blinking. If recording is finished, the 3 Leds on the front panel will blink and the displayed number will be 0. To stop at anytime, just press pushbutton 4 once.
4. Whe recording is finished, please run UDLloader in your PC to upload the record file in the S-256/512 to PC.

Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page	2 / 14

If your PC is currently running ISaGRAF workbench, please run “Tools” – “ICP DAS” – “ICPDAS UDownloader”. Then you will see the windows listed in step (5).

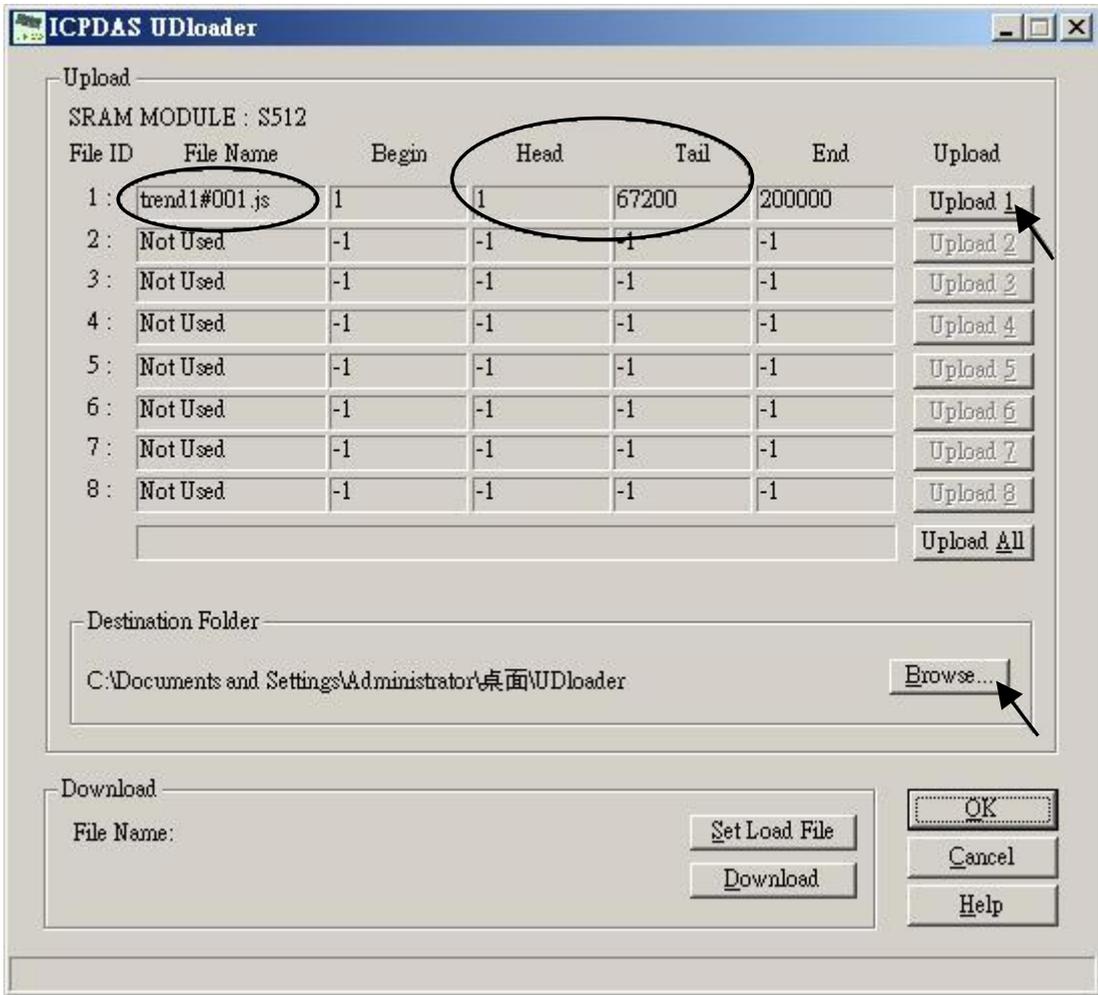

If your PC is not running ISaGRAF workbench, please copy “UDloader.exe” from the ‘..\faq058_demo\vb6_demo_6’ folder to for example PC windows’s desktop. Then please run it. Set proper “Link Setup” (If click on “Browse”, you may modify the file upload location path). Then click on “Ok” and “Ok” to save this setting, then run it again.

Classification	ISaGRAF English FAQ-058							
Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page	3 / 14	

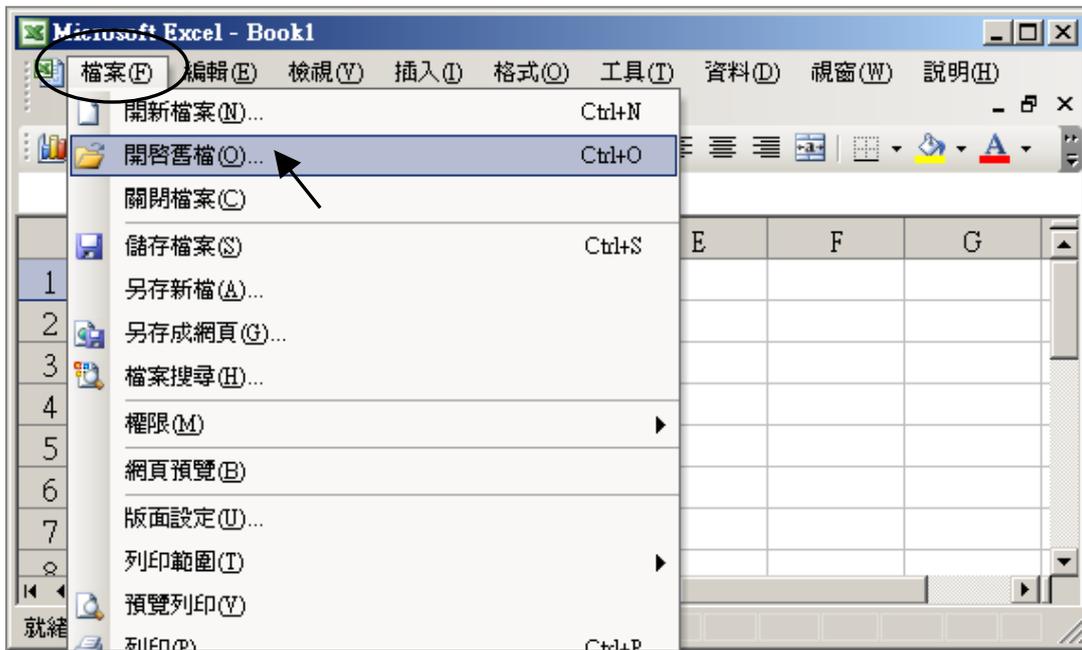

5. If the PAC is well connected, you will see a File Name displayed on the below window. Value of “Head” and “Tail” is the current size of the record file in the S-256/S-512. The below example shows 67,200 bytes. (Note: S-256/S-512 has size limitation, please refer to section 10.3 of the [ISaGRAF user manual](#)). you may modify the file upload location path by click on “Browse ...”. Then please click on “Upload 1” to upload this record file to your PC.

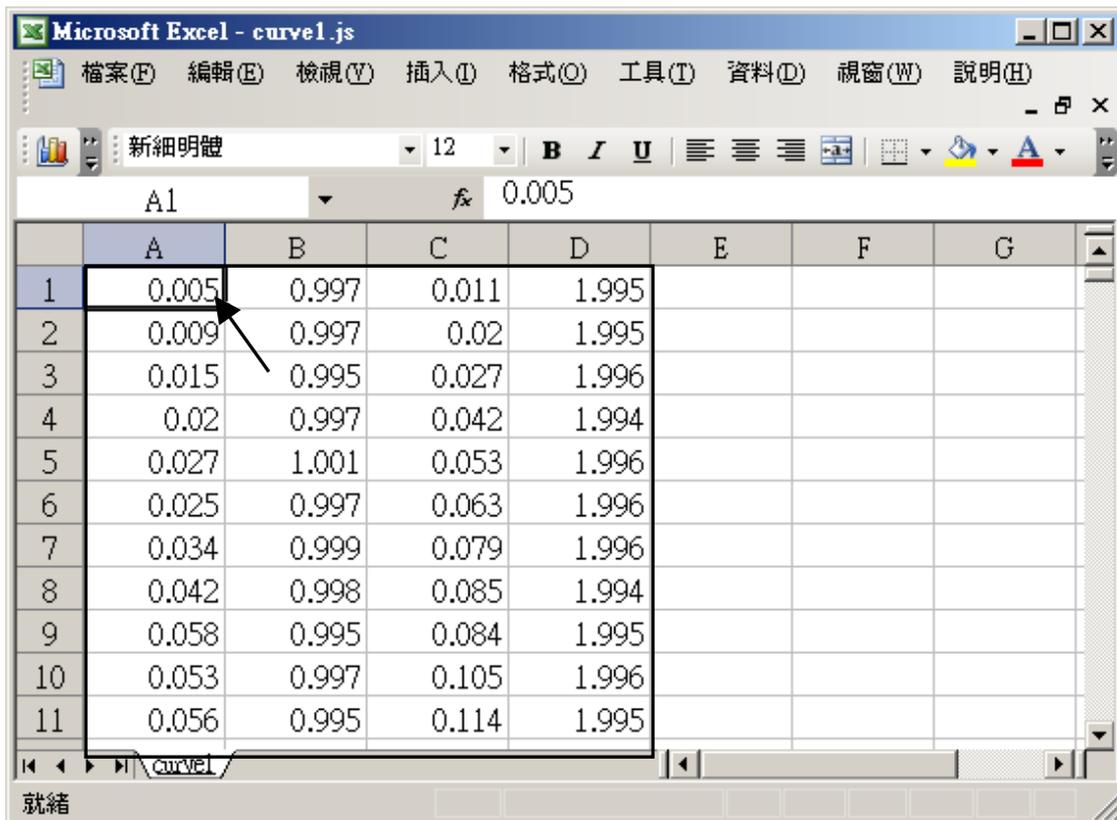

Then you may check if the record file is upload to your PC at the same path.

6. Then please open this record file - “trend1.js” on M.S. Excel.

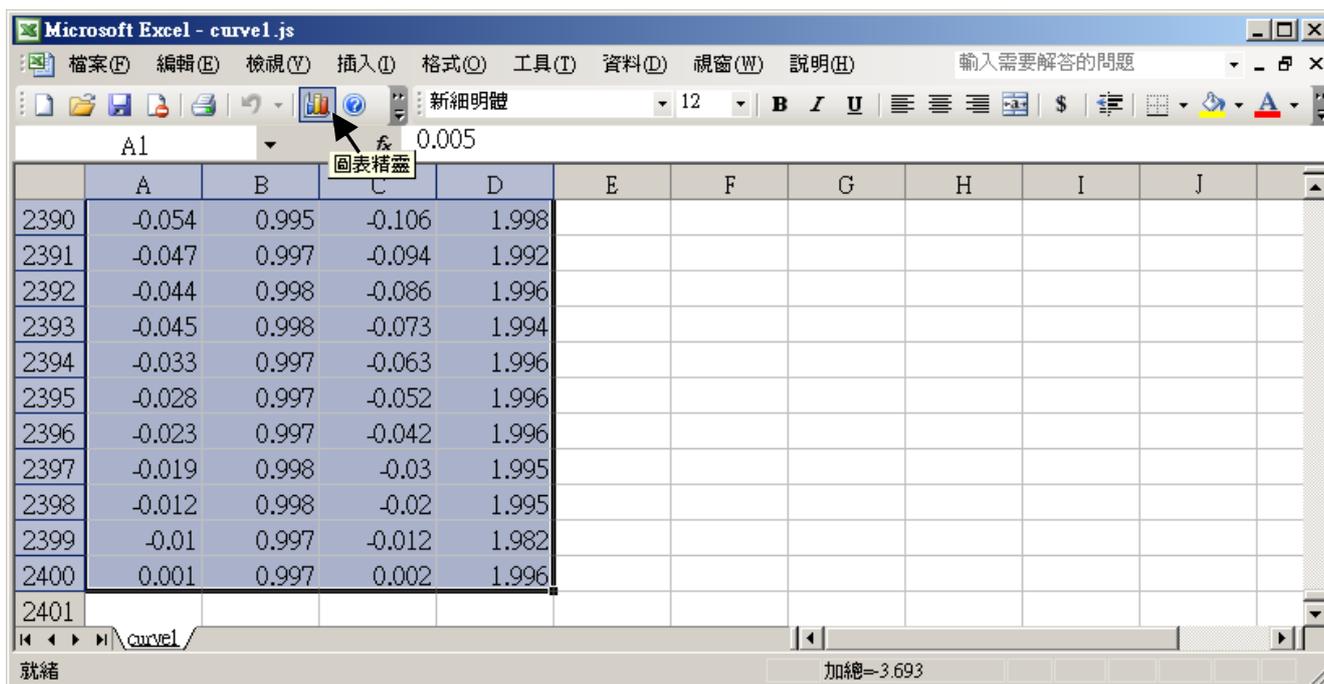

Please click on the first data at the left-top position. Then press and hold in “Shift”, and at the same time press “Ctrl” – “End”. You will see all data been selected.

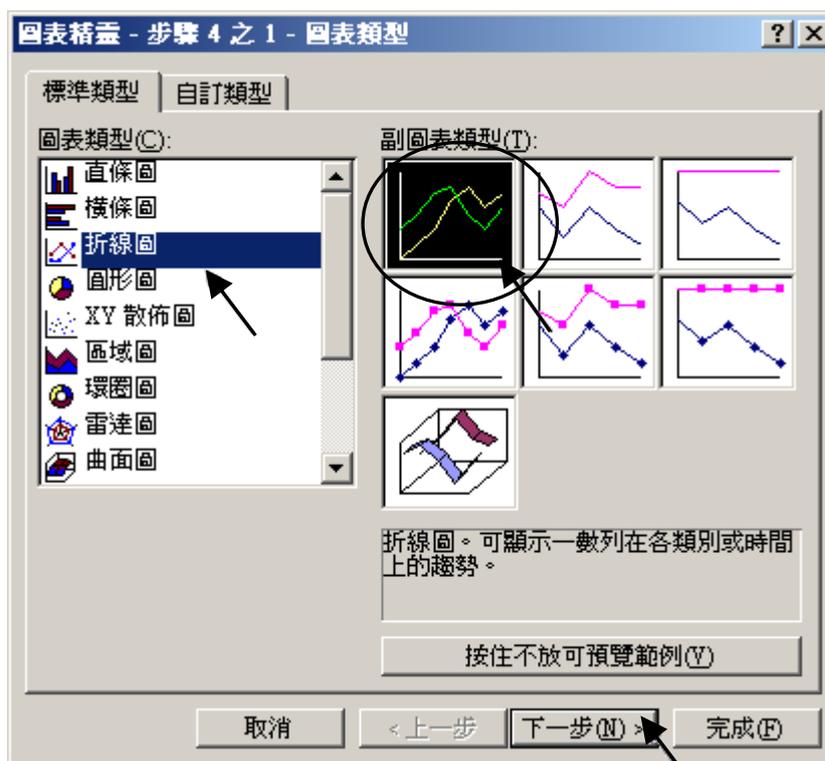

Classification	ISaGRAF English FAQ-058					
Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page 5 / 14

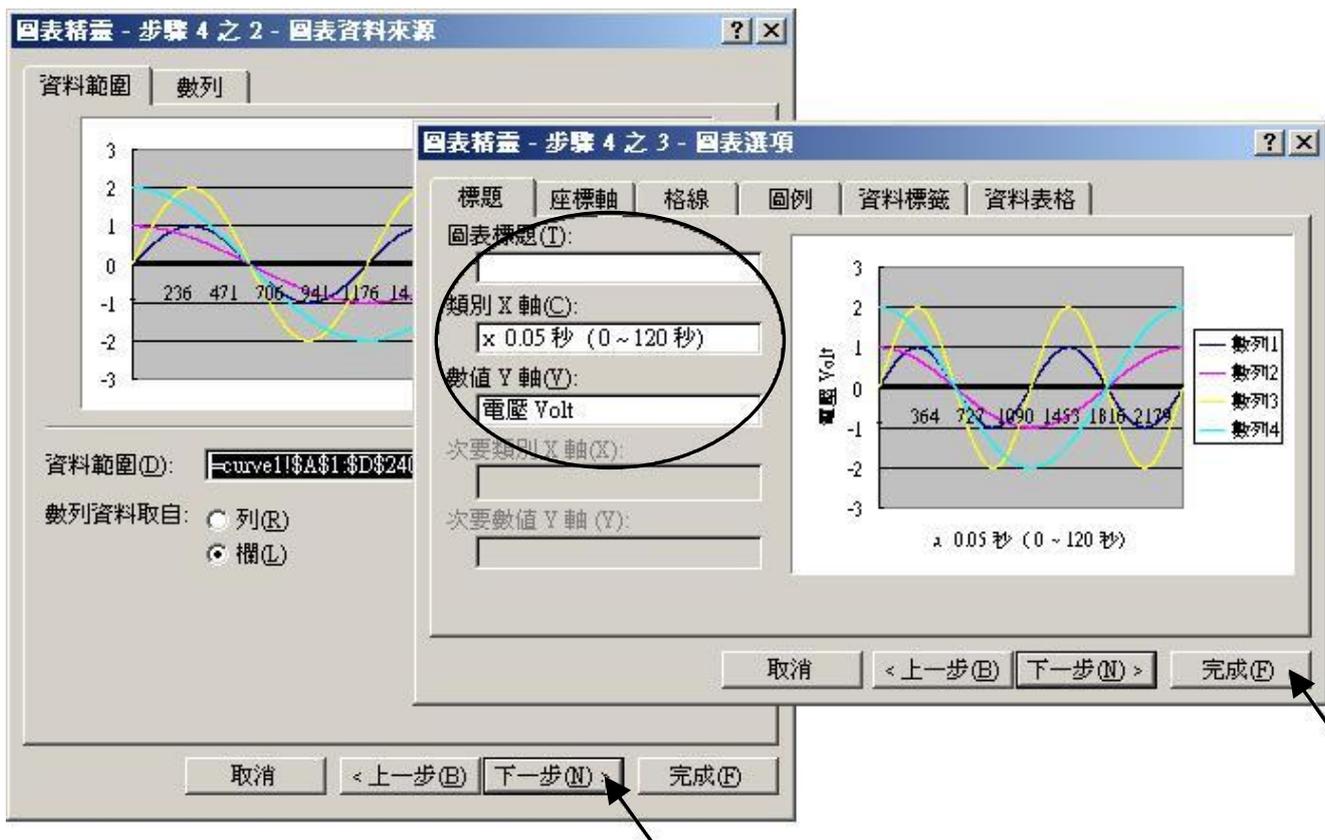

Then click on **Chart Wizard**. 

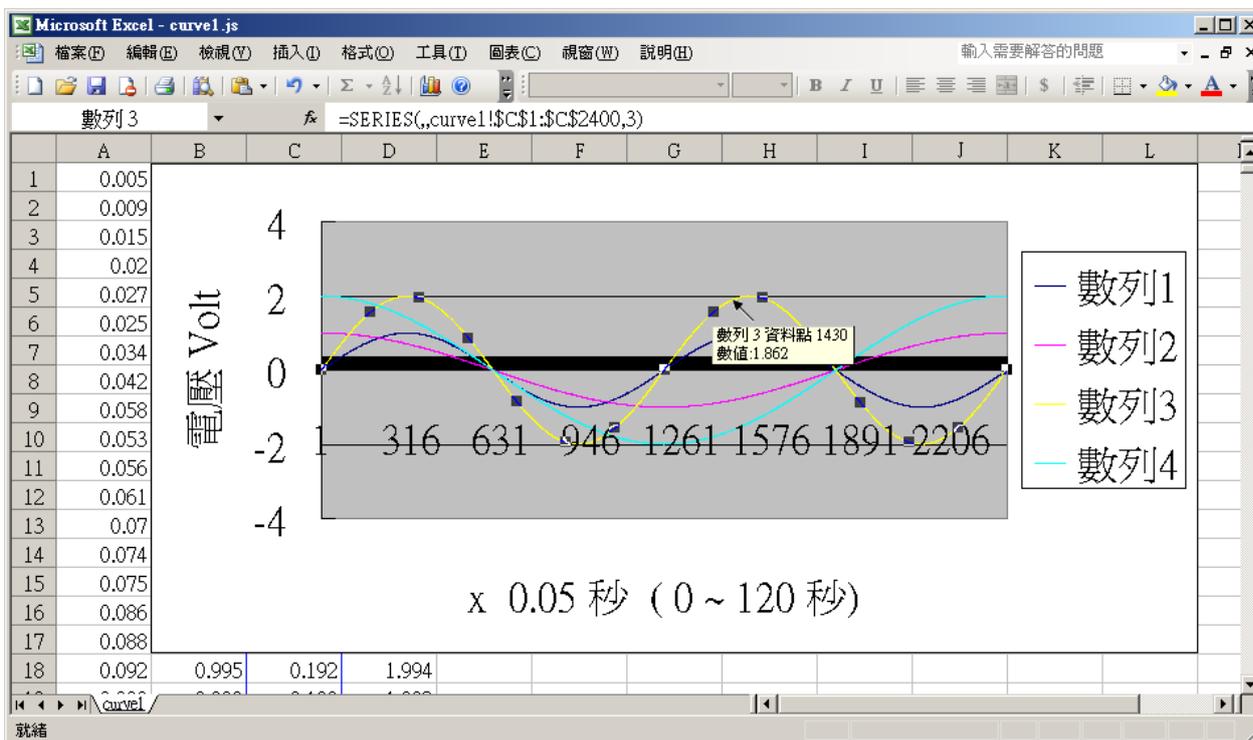

Please select the correct diagram on the left-hand side. And check the left-top type on the right-hand side. Then go Next .

Classification	ISaGRAF English FAQ-058						
Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page	6 / 14

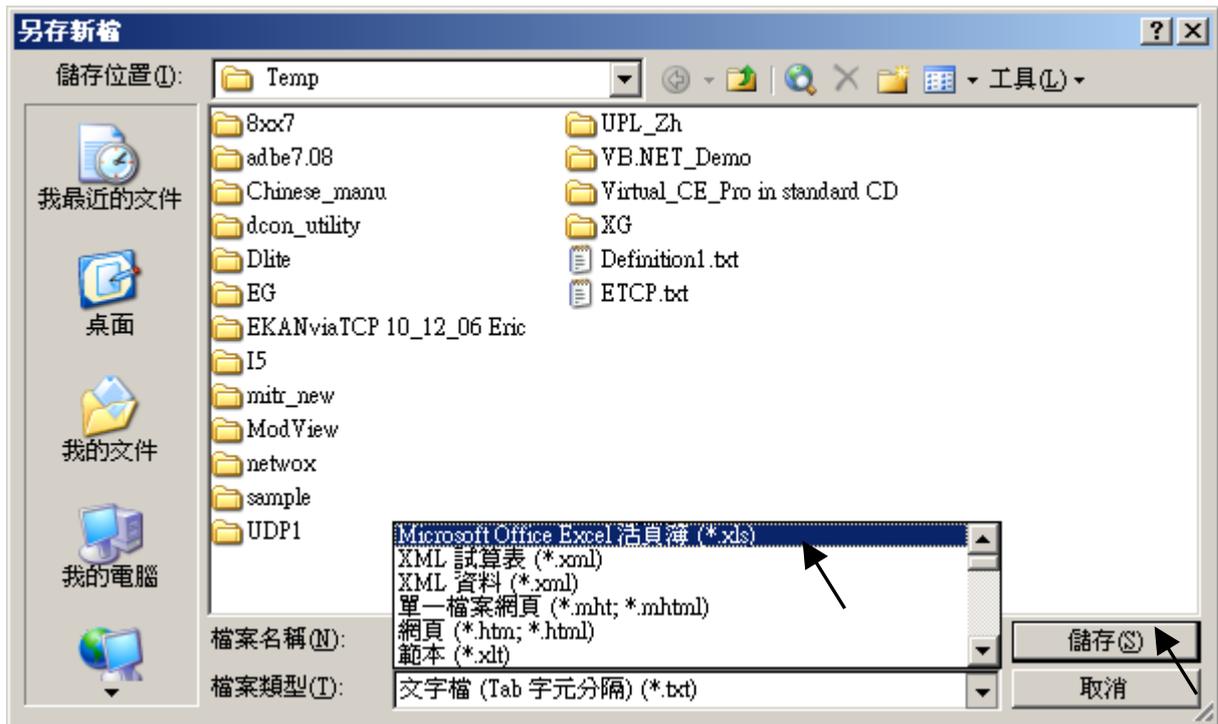

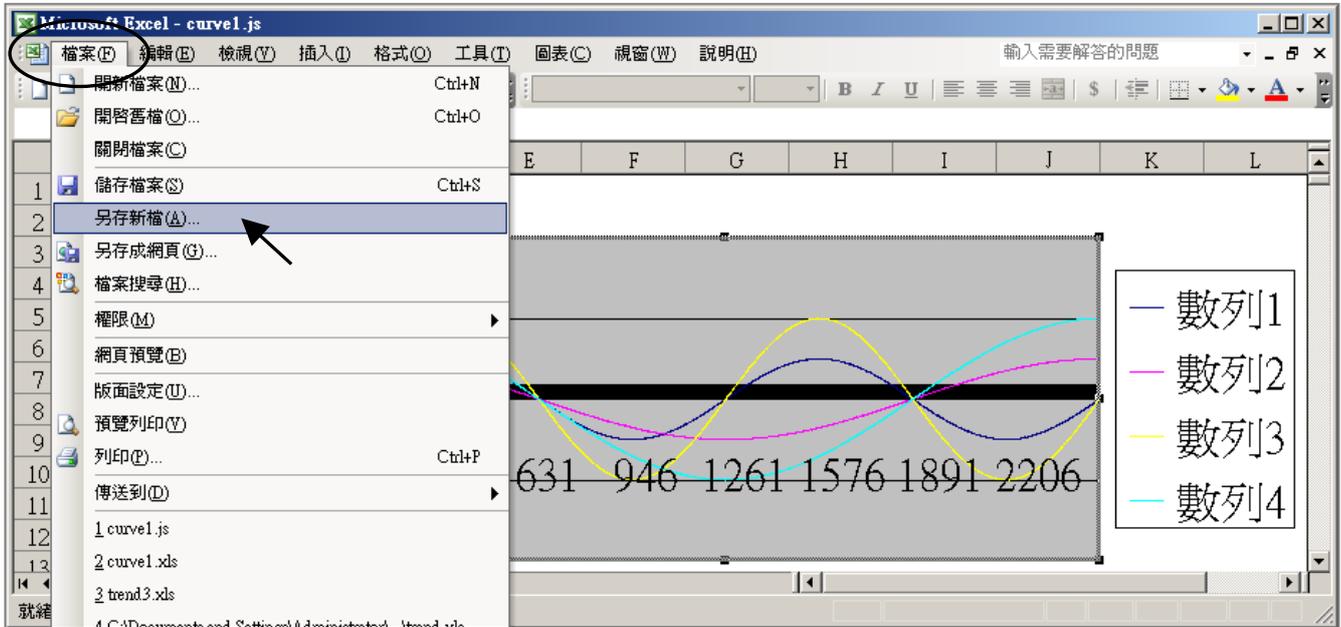

By the procedure, you will get the trend curve as the below window. You can modify its size, or check at any trend line. If you move your mouse to point at some position at the trend line, the related data is shown.

Classification	ISaGRAF English FAQ-058						
Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page	7 / 14

Please save this trend curve diagram as a “Microsoft Office Excel (*.xls)” format. Then at any later time, you can open it to display the trend curve directly.

Note: The user can also execute 'Demo_6.exe' in the '..\faq058_demo\vb6_demo_6' folder on PC for operating with the connected ISaGRAF PAC.

ISaGRAF project architecture:

Variable :

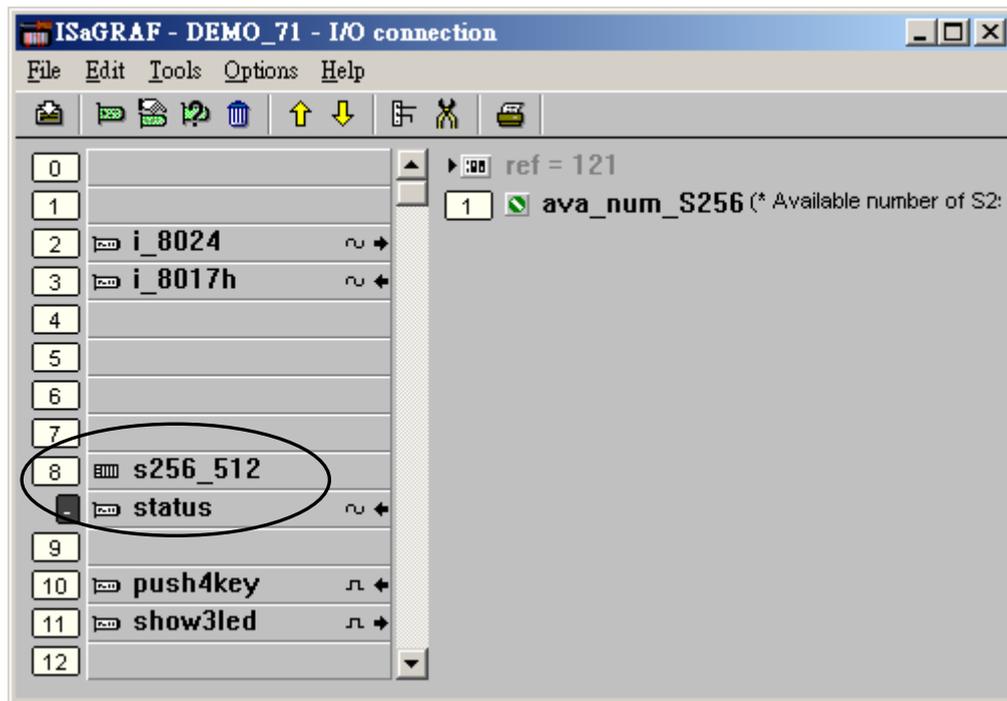

Please refer to section 2.6 of the [ISaGRAF user manual](#) or FAQ-039 for description of “Variable array”.

Name	Type	Attribute	Description
Go1	Boolean	Internal	Set as True to start, addr defined as 21 (Hex. is 15)
Stop1	Boolean	Internal	Set as True to stop, addr defined as 22 (Hex. is 16)
TMP	Boolean	Internal	Internal use
INIT	Boolean	Internal	Init as True
L1 , L2 , L3	Boolean	Output	connect to show3Led 's Ch.1 to Ch.3
K1 , K4	Boolean	Input	Connect to push4key 's Ch.1 to Ch.4 Push K1 to start recording. K4 to stop
To_Blink	Boolean	Internal	To control blinking of the number on the front panel
MUM_CH	Integer	Constant	How many chanel in I-8017H to record ? We use 4 chanel in this demo (Ch.1 to 4)
Ava_num_s256	Integer	Input	Connect to “S256_512” 's Ch.1 . if value is 0, it means can not find S-256 / 512
Current_pos1	Integer	Internal	Current operating byte address in S-256/512
Len1 , TMP_V	Integer	Internal	Internal use
File_begin1 File_end1	Integer	Constant	The Begin & End byte address in the S-256/S-512 allocated for the record file
STEP1	Integer	Internal	Recording state. 0:No action , 1:recording , 2:finished
Period1	Integer	Internal	How long to record ? unit is minute, addr as 3
Interval1	Integer	Internal	How long to save a record ? unit is ms, addr as 1
Total_record1	Integer	Internal	How many records in this recording action? This value is calculated by the IsaGRAF program automatically. addr declared as 5

Classification	ISaGRAF English FAQ-058						
Author	Chun Tsai	Version	1.0.0	Date	Mar. 2007	Page	9 / 14

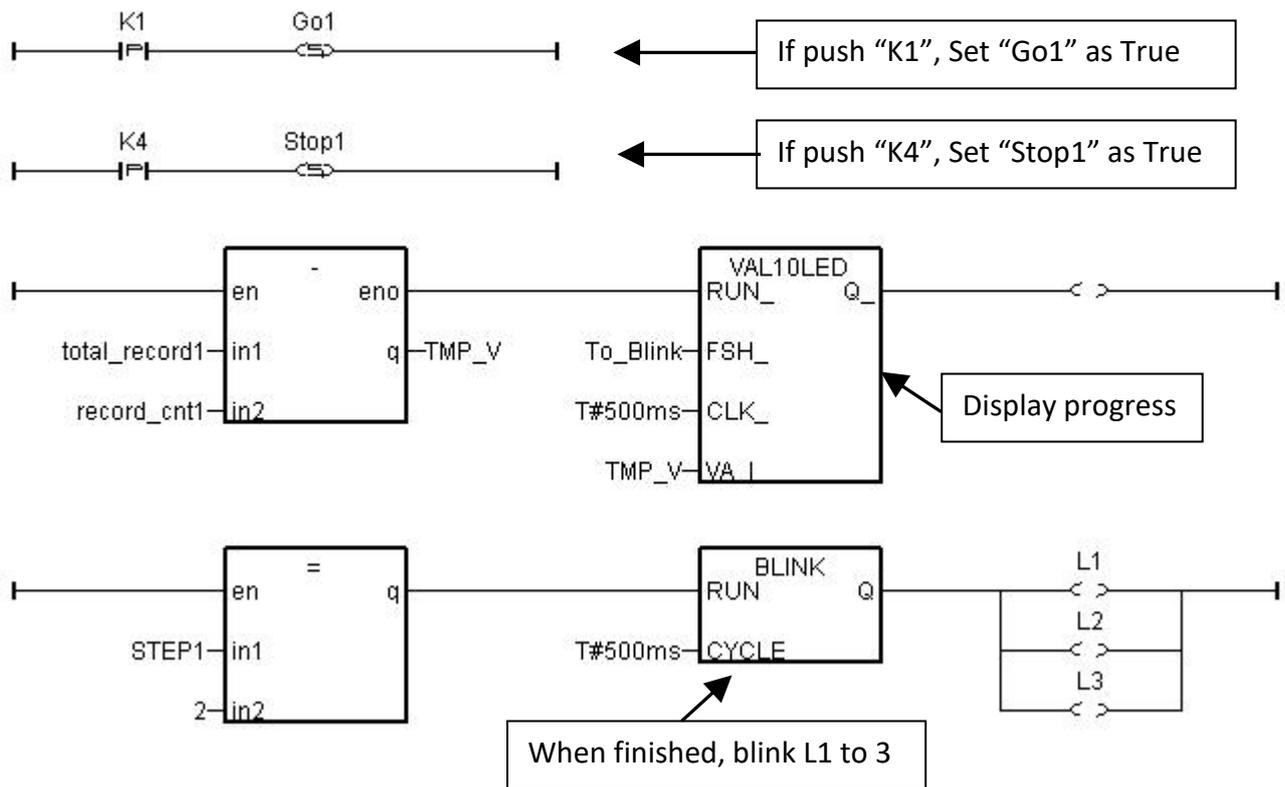

Record_cnt1	Integer	Internal	Current finished record count. addr declared as 7
ii	Integer	Internal	To use in “for” loops
i8017H[0..7]	Integer	Input	Variable array, Dim as 8. link to I-8017H ‘s Ch. 1 to Ch. 8
Volt1[0..7]	REAL	Internal	Variable array, Dim declared as 8. The voltage value converted from “i8017H[0..7]”
i8024[0..3]	Integer	Output	Variable array, Dim declared as 4. link to I-8024’s Ch1 to Ch. 4
T1	Timer	Internal	For counting time
T1_next	Timer	Internal	The time to get and save next record
T1_Interval	Timer	Internal	The interval time between two record
Msg1	Message	Internal	Operation state message, Len is 255, init as “No Action now”, addr as 41 (Hex. is 29)
Str1	Message	Internal	Len is 255, internal use

IO connection:
