

GSMnet_Demo Quick Start Guide

簡易操作手冊

1. Open the GSMNetDemo.exe

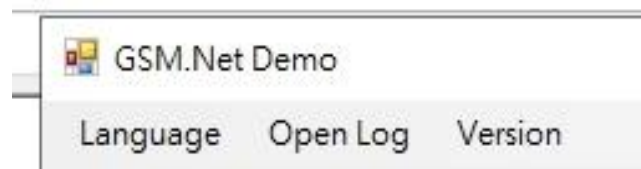

2. "Modem Port" and "AT Port" respectively correspond to the "Modem" and "AT Port" displayed in **Device Manager**.

3. Click the "Initialize" button to confirm the registration status and signal.

4.If you need assistance troubleshooting, please select the AT port on the right, and click 'Start testing'."

5. After the message is displayed, please click to 'open the log'.

6.The log file data will then be returned to the engineer to assist you in troubleshooting.
